Outdoor activities. Travels and tourism. sport and cinema.

Experience

Freelance Projects

Card Game

- October 2021

- Development of memory game type cards with colors, it is about guessing the color that is shown through a code. All the logic is done in Front-End. some functionalities are: - Change Easy-Hard mode, - Restart the game.

Weather App

- January 2022

- Development of a Single Page Application that consumes an external API to bring information from different cities. All the logic is done in Front-End. some functionalities are: - Search by name, - Detailed information of each city.

Movie Cards

- January 2022

- Development of a Single Page Application that consumes a local API to fetch information from different movies. All logic is done in React. Some features are: -Render each card on the browser screen - Full responsive

Video Game SPA

- May 2022

- Development of a SPA with React, Redux, Node in the backend, Sequelize and Postgresql as a database, where I make a call to the Rawg Api to show information of many video games and create one through a form.
